

# DIGIMIC EXTERNAL MICROMETER

## Size Ranges and Further Features

Using the micrometer has been made as simple as possible with minimal set up required. To reduce the battery consumption without losing the current reference position, a standby mode is automatically activated after 10 minutes of downtime. DigiMic has an automatic wake up activated by movement on the thimble.

This initial launch is for the 0 – 25mm, however incremental sizes up to 100mm will be available in the near future.
